Proving the Value of Soft Skills Patricia Pulliam Phillips, Jack J. Phillips, Rebecca Ray, 2020-08-04 A Step-by-Step Guide to Showing the Value of Soft Skill Programs As organizations rise to meet the challenges of technological innovation, globalization, changing customer needs and perspectives, demographic shifts, and new work arrangements, their mastery of soft skills will likely be the defining difference between thriving and merely surviving. Yet few executives champion the expenditure of resources to develop these critical skills. Why is that and what can be done to change this thinking? For years, managers convinced executives that soft skills could not be measured and that the value of these programs should be taken on faith. Executives no longer buy that argument but demand the same financial impact and accountability from these functions as they do from all other areas of the organization. In *Proving the Value of Soft Skills*, measurement and evaluation experts Patti Phillips, Jack Phillips, and Rebecca Ray contend that efforts can and should be made to demonstrate the effect

of soft skills. They also claim that a proven methodology exists to help practitioners articulate those effects so that stakeholders' hearts and minds are shifted toward securing support for future efforts. This book reveals how to use the ROI Methodology to clearly show the impact and ROI of soft skills programs. The authors guide readers through an easy-to-apply process that includes: business alignment design evaluation data collection isolation of the program effects cost capture ROI calculations results communication. Use this book to align your programs with organizational strategy, justify or enhance budgets, and build productive business partnerships. Included are job aids, sample plans, and detailed case studies.

The 71F Advantage National Defense University Press, 2010-09 Includes a foreword by Major General David A. Rubenstein. From the editor: 71F, or 71 Foxtrot, is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human

dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living. In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the grey-beards of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families.

Strength-Based Leadership Coaching in Organizations Doug MacKie,2016-03-03 Positive organizational psychology, with its focus on the identification and development of strengths, is a natural ally to executive development and leadership coaching. However, this approach is only just beginning to come to the attention of organizations and consequently, the research base for strength-based coaching is in its early stages of development. Strength-based Leadership Coaching in Organizations reviews strength-based approaches to positive leadership development and evaluates the evidence for their effectiveness, critically assesses their apparent distinctiveness and considers how strengths can be reliably assessed and developed in their organizational context. Strength-based Leadership Coaching in Organizations reviews key areas of leader and team development and describes a model of strengths development in organizations. It discusses the application of strength-based leadership coaching from the managerial and external perspective within the context of career stage, seniority, role challenges and organizational need in order to facilitate meaningful change. Finally, it covers the limitations of the strength-based approach to leadership development together with the challenges of integrating positive leadership development. It shows exactly what a strengths focus is and that there is increasing evidence that this approach does get results. Where other books focus on one model of identifying strengths, this book offers a balanced and critical examination,

showing how to apply a positive strength-based approach.

Managerial Effectiveness in a Global Context Jean Brittain Leslie, Maxine A. Dalton, Christopher Ernst, Jennifer J. Deal, 2002 The rapid expansion of globalization and multinational corporations means more and more managers work across the borders of multiple countries. Some of them are expatriates; most are not. And although many of these managers are not wrestling with the issues of relocating and adjusting to living in a different culture, they all find themselves dealing with cultural issues - defined in the broadest context - every time they pick up the phone, log onto their e-mail, or disembark from an airplane. What do these managers do? Is it different from the work they did when they managed in their own countries, and if it is different, how so? What does it take for them to be effective when they manage across so many countries simultaneously? What do these managers need to know in order to be effective? What do organizations need to know and do in order to select and develop people who will manage and lead effectively in the global economy? This report addresses those questions as it documents the findings of a Center for Creative Leadership research study into what factors might predict managerial effectiveness in a global context.

Making the Right Connections Susan Tsui Grundmann, 2011-05 Some abilities needed for Federal jobs may be inherently more difficult to learn than others. Research on mental abilities distinguishes among those that can be developed through training, those that are unresponsive to training, and those that are moderately responsive. This dimension is known as trainability. This report contrasts employee perceptions of the trainability of job-relevant abilities with research findings about the actual trainability of these abilities. The goal is to help agencies use training resources to enhance individual and organizational performance by highlighting abilities for which training may be less beneficial than other organizational improvement strategies. Charts and tables.
