**Light Infantry Tactics for Small Teams** Christopher E. Larsen, 2005 There were no marching bands welcoming home returning troops from Vietnam, no ticker-tape parades for its heroes and no celebrations in Time Square. Instead, returning Vets were confronted with a range of reactions, not the least of which were indifference, silent disapproval, criticism, hostility and even contempt, in some quarters, for their lack of cleverness in not avoiding service in a war zone. Most returning Vietnam warriors were bewildered by the reactions of their fellow countrymen; but, then how could they possibly comprehend the psychological phenomenon which was only beginning to take hold and would later be named the Vietnam Syndrome, a phenomenon which, at its extremes, was manifested in a revulsion to all things military? Even those who were proud of the returning servicemen and women were hardly effusive in their praise and greeted them with only muted enthusiasm. Most of these young veterans of an undeclared war had been shaped and molded in their formative years by the patriotic fervor which seized America during World War II and continued for perhaps a decade and a half after V. J. day. But, American society had profoundly changed in the 1960s with a shift in emphasis away from national goals to more individual ones such as civil rights, sexual liberation, pacifism, academic freedom, consciousness raising and a reaction against the excesses of the military industrial complex, ironically named by President Dwight D. Eisenhower. The cataclysmic cultural

revolution of the 1960s collided violently with the more nationalistic goals of containing the spread of international communism and curbing the expansionist policies of the Soviet Union and Red China. Those who actually fought the Vietnam War became collateral victims of a wrenching cultural war, not of their own making; for the core values of these young men and women had, for the most part, not changed. Just as the World War II generation was imbued with traditional values of patriotism, loyalty to one's comrades, anti-totalitarianism and democratic freedom, most heroes of the Vietnam War were similarly grounded. The major difference is that while the former were celebrated, the latter were largely forgotten. Last Full Measure of Devotion calls upon us to revisit this remarkable generation of military heroes and, at long last, accord them the recognition withheld from them for almost four decades. The 22 individual profiles of Vietnam heroes contained between these covers are meant to be representative of the vast majority of Americans who served with honor in that lonely and beleaguered country on the South China Sea, more than thirty-five years ago.

**Handbook for Tactical Operations in the Information Environment** Michael Schwillie, Jonathan Welch, Scott Fisher, Thomas M. Whittaker, Christopher Paul, 2021 Early-career officers in tactical units must understand and operate in an increasingly complex information environment. Poor communication with command-level decisionmakers and errors in judgment can be costly in the face of sophisticated adversary capabilities and while operating among civilian populations. There are few opportunities for formal education and training to help officers prepare for operations in the information environment (OIE), and it can be difficult to know how to employ the tactics, techniques, and procedures of tactical-level maneuver-focused operations in support of OIE-related capabilities and activities. With its quick-reference format and series of illustrative vignettes, this handbook is intended to facilitate tactical problem-solving and increase officers' awareness of when and how they can contribute to the goals of OIE.--Back cover.

OPFOR SMARTbook 3 - Red Team Army Norman M. Wade, Christopher Larsen, 2014-10 It has been nearly thirty years since a holistic explanation of the Soviet-based Opposing Force (OPFOR) was examined in the U.S. Army Field Manual 100-2 series. Recognizing this, OPFOR SMARTbook 3: Red Team Army re-examines and outlines the doctrinal operational construct and historical foundations of Soviet-era military forces from the FM 100-2 series, which is now out-of-print and largely unavailable. Second, OPFOR SMARTbook 3 reorganizes that foundational material and aligns it in keeping with contemporary military doctrinal taxonomy to include ADRP 3-0 Unified Land Operations and ADRP 3-90 Tactics. Third, OPFOR SMARTbook 3 translates and bridges the strategic- and operational-level doctrine into tactical application at the small-unit level. Through this triangulation, a more modern rendition of Red Team Armies emerges. \*\*\* Find the latest edition of this book and the rest of our series of military reference SMARTbooks at the publishers website: [www.TheLightningPress.com](http://www.TheLightningPress.com) \*\*\*

**The Russian Way of War** Lester W. Grau, Charles K. Bartles, 2018 Force Structure, Tactics, and Modernization of the Russian Ground Forces The mighty Soviet Army is no more. The feckless Russian Army that stumbled into Chechnya is no more. Today's Russian Army is modern, better manned, better equipped and designed for maneuver combat under nuclear-threatened conditions. This is your source for the tactics, equipment, force structure and theoretical underpinnings of a major Eurasian power. Here's what the experts are saying: A superb baseline study for understanding how and why the modern Russian Army functions as it does. Essential for specialist and generalist alike. -Colonel (Ret) David M. Glantz, foremost Western author on the Soviet Union in World War II and Editor of The Journal of Slavic Military Studies. Congratulations to Les Grau and Chuck Bartles on filling a gap which has yawned steadily wider since the end of the USSR. Their book addresses evolving Russian views on war, including the blurring of its nature and levels, and the consequent Russian approaches to the Ground Forces' force structuring, manning, equipping, and tactics. Confidence is conferred on the validity of their arguments and conclusions by copious footnoting, mostly from an impressive array of primary sources. It is this firm grounding in Russian military writings, coupled with the authors' understanding of war and the Russian way of thinking about it, that imparts such an authoritative tone to this impressive work. -Charles Dick, former Director of the Combat Studies Research Centre, Senior Fellow at the Defence Academy of the United Kingdom, author of the 1991 British Army Field Manual, Volume 2, A Treatise on Soviet Operational Art and author of From Victory to Stalemate The Western Front, Summer 1944 and From Defeat to Victory, The Eastern Front, Summer 1944. Dr. Lester Grau's and Chuck Bartles' professional research on the Russian Armed Forces is widely read throughout the world and especially in Russia. Russia's Armed Forces have changed much since the large-scale reforms of 2008, which brought the Russian Army to the level of the world's other leading armies. The speed of reform combined with limited information about their core mechanisms represented a difficult challenge to the authors. They have done a great job and created a book which could be called an encyclopedia of the modern armed forces of Russia. They used their wisdom and talents to explore vital elements of the Russian military machine: the system of recruitment and training, structure of units of different levels, methods and tactics in defense and offence and even such little-known fields as the Arctic forces and the latest Russian combat robotics. -Dr. Vadim Kozyulin, Professor of Military Science and Project Director, Project on Asian Security, Emerging Technologies and Global Security Project PIR Center, Moscow. Probably the best book on the Russian Armed Forces published in North America during the past ten years. A must read for all analysts and professionals following Russian affairs. A reliable account of the

strong and weak aspects of the Russian Army. Provides the first look on what the Russian Ministry of Defense learned from best Western practices and then applied them on Russian soil. -Ruslan Pukhov, Director of the Moscow-based Centre for the Analysis of Strategies and Technologies (CAST) and member of the Public Council of the Russian Federation Ministry of Defense. Author of Brothers Armed: Military Aspects of the Crisis in Ukraine, Russia's New Army, and The Tanks of August.
