The African Wild Dog IUCN/SSC Candid Specialist Group,1997 Over the last 30 years the African wild dog population has declined dramatically. Dogs have disappeared from 25 of the 39 countries where they were previously found, and only 6 populations are believed to number more than 100. Today it is believed that only between 3,000-5,500 dogs remain in 600-1,000 packs with most to be found in eastern and southern Africa. The dramatic reduction in their population is attributed to a number of factors including human population growth and activities, deterioration of habitat, and contact with domestic dogs and their diseases. This Action Plan explores some of the reasons behind their disappearance and provides a number of proposed solutions split into 3 priority areas, ranging from habitat management and conservation to monitoring domestic dogs.

Employment Guarantee Programme and Dynamics of Rural Transformation in India Madhusudan Bhattarai,P.K. Viswanathan,Rudra N. Mishra,Cynthia Bantilan,2018-06-08 This book offers an assessment of the performance, impact, and welfare implications of the world's largest employment guarantee programme, the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA). Launched by the Indian government, the programme covers entire rural area of the country. The book presents various micro-level analyses of the programme and its heterogeneous impacts at different scales, almost a decade after its implementation. While there are some doubts over the future of the scheme as well as its magnitude, nature and content, the central government appears committed to it, as a 'convergence scheme' of various other welfare and rural development programmes being implemented at both national and state level. The book discusses the outcomes of the programme and offers critical insights into the lessons learnt, not only in the context of India, but also for similar schemes in countries in South and South-East Asia as well as in Africa, and Latin America. Adopting inter-disciplinary perspectives in analysing these issues, this unique book uses a judicious mix of methods---integrating quantitative and qualitative tools---and will be an invaluable resource for analysts, NGOs, policymakers and academics alike.

Skip Intro Duncan McAlester, Michelangelo Capraro, 2002 Skip intro is designed to help educate the Flash community specifically and designers/programmers at large that usability isn't a dirty word. It doesn't mean making boring, predestrian web sites, and it doesn't mean abandoning Flash. Quite the contrary, Flash offers advanced usability elements that traditional HTML web sites could never hope to achieve. This book will show designers how to start thinking about their users, and more importantly, how to translate that understanding when they start designing or coding. - back cover.
